

THE ATLAS PROJECT

The Atlas Project, Gantor-B17, Port A
ID: 053341

Mission: To experiment and collect data on wormhole theories as discovered by The Atlas Project lab.

Duration: One Year from message received.

Return Point: Gantor-B17

Message to Captain:

As discussed in our meeting, we want to keep this mission discreet. We have not publicly announced our plans as you know, much of the team here are fairly paranoid, being that this research is so valuable. I have assured them that we can trust you to bring us the data we need. Your ship is suitable, and the majority of your crew are agreeable. However, we still have our reservations about some members of your crew, but the board seem to have been convinced that they can be trusted, thanks to you.

We all look forward to seeing you again Captain Jordan, safe travels and remember to contact us in any kind of emergency.

Regards,

Dr. Sisix

Ship: SUNSPEAR MKIII model 51B-12

Crew: Au, Adora (Engineer), Biggs, Drew (AI Technician), Duke, Marcus (Researcher), Jordan, Percy (Captain), Morgan, Trix (Ship Manager), Ragon, Quill (Researcher), Russo, Gordon (Defence Expert), Young, Cassie (Navigator)
